Professional Experience

Paracosma, Nepal — *Game Developer*

March 2022- PRESENT

AR/VR Development :

- Developed AR and VR training simulation games for the medical and industrial sector.
- Used motion capture and virtual production in Unreal Engine to create engaging content.
- Assisted the team with graphical and 3D requirements as needed.

3D Web Development :

- Developed 3D library site for gas and vehicle company.
- Create landing page for 3D model player marketing page.

Digital Twin :

- Built a digital twin visualizer in Unreal Engine to simulate hydrogen leaks and display effects on wind, pressure, graphs, and point cloud data.

ML Data Generation :

- Created an Unreal Engine app to import 100 models, capture 72 angles with RGB and depth maps, and export images at 1024×1024, 512×512, and 256×256 for ML training.

Presidential Graduate School (Westcliff University, USA) Nepal — *Part Time Game Development TA*

July 2024 - january 2025

- Instructed students in Summer Game Development classes.

G-Force Security, Nepal— *Graphic Designer*

May 2019 - October 2021

- Designed product resell graphics, festival-themed designs, and informational motion graphics.
- Designed office document layouts, graphical banners and social media posts

Technical Skills

Game Development: Unreal Engine (Virtual Production), Unity (Game Developer/XR, VR/AR Developer, VP Artist)

Web Development: MERN Stack, Three.js

Programming Languages: JavaScript, C/C++, Python, C#

Design Tools: Photoshop, Affinity Designer, Adobe Premiere Pro, Figma, Adobe After Effects, DaVinci Resolve, Blender, Articulate 360

Awards

Hult Prize 2nd place, Khana App

Best final year project 2022, Nepali Folklore Game, Sunway College Kathmandu.

Languages

Nepali, English, Hindi

Education

Sunway College Kathmandu (Infrastructure University Kuala Lumpur) , Mait Devi Marg, Kathmandu— *BCS Hons*

Duration: 2019 - 2022

CGPA: 3.703

Herald International College, Basundhara, Kathmandu— *Higher Secondary Education (Science - Physics)*

Duration: 2016 - 2018

CGPA: 2.65

Projects

AR Ads — *Sunway AR Ads in chamber of commerce EXPO nepal 2025*

Description: AR ad system at Expo Nepal 2025 to showcase AR ads. QR scan opens website, activating camera for AR.

Functionality:

- **3D Building:** Banner image triggers 3D college model overlay.
- **College Ads:** Another banner triggers a promotional ad overlay.

Technologies: A-Frame, Three.js, MindAR.js

My Role: Developed the AR application to render the 3D building and display the advertisement based on image recognition. Integrated the QR code access and website for the AR experience.

Key Features: Interactive AR advertisement display, image-based AR triggering, web-based AR.

Himoobie store warranty system— *warranty validation system*

Description: A web platform for Himoobie store customers to register purchased tech products and for store owners to validate warranties.

Technologies: React, Tailwind CSS, Next.js (Frontend), MongoDB (Database)

My Role: Developed user registration and warranty validation in Next.js, incorporating MongoDB for data storage.

Key Features: Product registration by customers, warranty status validation for store owners, secure data storage.
